

Game: Call of Duty 2

Version: All Versions

Symptom: Crash on game start-up with error messages or no/partial demo controls with Seismovision 3

Error messages include:

*Error during initialization:  
Script compile error  
(see console for details)*

Or

*Attempted to overrun  
string in call to va()*

Solution:

Below is a screenshot of all files in the 'main' folder of Call of Duty 2 v1.3. The '.iwd' files are the data files for Call of Duty 2. Remove all '.iwd' files not contained in the list below and your problem should be solved.

Note:

All the problem reports that I received for Call of Duty 2 had the same solution. Some mod or add-on broke demo playback support or does not let the game start. Even if you think you do not have a mod or add-on installed in the 'main' folder, check again.
